

ENGINEERING AND SUPPORT SERVICES PRODUCT / SERVICE CATALOGUE

Our team of highly skilled engineers and support staff has over 30 years of experience in fulfilling Continued Airworthiness and Asset Management and supporting Line / Base Maintenance activities.

ENGINEERING SERVICES

Continued Airworthiness Management (CAM) Support Activities

Building on a wealth of experience fulfilling the CAMO role for parent airline, SriLankan Airlines, SriLankan Engineering is already providing support to regional operators wishing to fulfill EASA Part M or similar regulatory requirements. We offer our customers' the opportunity to focus operational resources on the core business by providing the following CAM support services:

- CAM consulting for start-ups
- MPD analysis and Maintenance Program preparation
- Service bulletin and airworthiness directive evaluation and incorporation
- Management of modifications and repairs (including landing gear replacements)
- Technical Records

We also share both operational and project management experience with our customers by offering a multitude of value-added services, including:

Aircraft Acceptance & Delivery
